

Section 1. Identification

GHS product identifier: Go Time 1-Step Gel - Rough Tough & In The Buff

Other means of: Not available

identification

Product type: Liquid.

Relevant identified uses of the substance or mixture and uses advised against

Not applicable.

Supplier's details: Young Nails Inc. **Distributor's details** : Young Nails Australia 6/8 Molendiner St

1149 N Patt St. Anaheim, CA 92801 Queensland 4214

Emergency Telephone Numbers:

INFOTRAC: (USA) 1-800-535-5053 INTERNATIONAL CALL COLLECT 1-352-323-3500

AUSTRALIA: 1300 766 121 EMERGENCY: 000 POISON INFORM: 131126

Section 2. Hazards identification

OSHA/HCS status: This material is considered hazardous by the OSHA Hazard

Communication Standard (29 CFR 1910.1200).

Classification of the

SKIN CORROSION/IRRITATION - Category 2 substance or mixture:

SERIOUS EYE DAMAGE/ EYE IRRITATION - Category 2A

SKIN SENSITIZATION - Category 1A

Percentage of the mixture consisting of ingredient(s) of unknown toxicity:

82%

GHS label elements

Hazard pictograms:

Signal word: Warning

Hazard statements: Causes serious eve irritation.

Causes skin irritation.

May cause an allergic skin reaction.

Precautionary statements

Prevention: Wear protective gloves. Wear eye or face protection. Avoid breathing

vapor. Wash hands thoroughly after handling. Contaminated work

clothing should not be allowed out of the workplace.

Response: IF ON SKIN: Wash with plenty of soap and water. Take off contaminated

clothing. Wash contaminated clothing before reuse. If skin irritation or rash occurs: Get medical attention. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to

do. Continue rinsing. If eye irritation persists: Get medical attention.

Storage: Not applicable

Disposal: Dispose of contents and container in accordance with all local, regional,

national and international regulations.

Hazards not otherwise

classified: None known

Section 3. Composition/information on ingredients

Substance/mixture: Mixture

Other means of identification:

Not available

CAS number/other identifiers

CAS number: Not applicable

Ingredient name	CAS number	EC number	INCI Name	%
*Acrylates Copolymer oligomer	25035-69-2	1	*Acrylates Copolymer oligomer	78
*Pentaerythritol tetra(3- mercaptopropionate)	7575-23-7	231-472-8	2-8 *Pentaerythritol tetra(3- mercaptopropionate)	
*2-Isopropyl Thioxanthone	495-84-1	1	*2-Isopropyl Thioxanthone	3
*Trimethylbenzoyl Diphenylphosphine Oxide	75980-60-8	278-355-8	*Trimethylbenzoyl Diphenylphosphine Oxide	5
Dimethicome	9006-65-9	I	Dimethicome	2

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

Section 4. First aid measures

Description of necessary first aid measures

Eye contact: Immediately flush eyes with plenty of water, occasionally lifting the upper

and lower eyelids. Check for and remove any contact lenses. Continue to

rinse for at least 10 minutes. Get medical attention.

Inhalation: Remove victim to fresh air and keep at rest in a position comfortable for

breathing. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention if adverse health effects persist or are severe. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing

such as a collar, tie, belt or waistband.

Skin contact: Wash with plenty of soap and water. Remove contaminated clothing and

shoes. Wash contaminated clothing thoroughly with water before

removing it, or wear gloves. Continue to rinse for at least 10 minutes. Get medical attention. In the event of any complaints or symptoms, avoid further exposure. Wash clothing before reuse. Clean shoes thoroughly

before reuse

Ingestion: Wash out mouth with water. Remove dentures if any. Remove victim to

fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be

kept low so that vomit does not enter the lungs. Get medical attention if adverse health effects persist or are severe. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway.

Loosen tight clothing such as a collar, tie, belt or waistband

Most important symptoms/effects, acute and delayed

Potential acute health effects

Eye contact: Causes serious eye irritation

Inhalation: No known significant effects or critical hazards.

Causes skin irritation. May cause an allergic skin reaction. **Skin contact:**

Ingestion: Irritating to mouth, throat and stomach.

Over-exposure signs/symptoms

Eye contact: Adverse symptoms may include the following:

> pain or irritation watering redness

Inhalation: No specific data

Skin contact: Adverse symptoms may include the following:

> irritation redness

No specific data. Ingestion:

Indication of immediate medical attention and special treatment needed, if necessary

Notes to physician: Treat symptomatically. Contact poison treatment specialist immediately if

large quantities have been ingested or inhaled.

Specific treatments: No specific treatment

Protection of first-aiders: No action shall be taken involving any personal risk or without suitable

> training. It may be dangerous to the person providing aid to give mouthto-mouth resuscitation. Wash contaminated clothing thoroughly with

Use an extinguishing agent suitable for the surrounding fire.

water before removing it, or wear gloves.

See toxicological information (Section 11)

Section 5. Fire-fighting measures

Extinguishing media Suitable extinguishing

media:

Unsuitable extinguishing

media: Specific hazards arising

from the chemical:

In a fire or if heated, a pressure increase will occur and the container

may burst.

None known

Hazardous thermal

decomposition products: Decomposition products may include the following materials:

> carbon dioxide carbon monoxide

Special protective actions

for fire-fighters:

Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any

personal risk or without suitable training.

Special protective

equipment for fire-fighters: Fire-fighters should wear appropriate protective equipment and self-

contained breathing apparatus (SCBA) with a full face-piece operated in

positive pressure mode.

Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

For non-emergency

personnel: No action shall be taken involving any personal risk or without suitable

training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate.

Put on appropriate personal protective equipment.

For emergency responders: If specialised clothing is required to deal with the spillage, take note of

any information in Section 8 on suitable and unsuitable materials. See

also the information in "For nonemergency personnel".

Environmental precautions: Avoid dispersal of spilled material and runoff and contact with soil,

waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or

air).

Methods and materials for containment and cleaning up

Small spill: Stop leak if without risk. Move containers from spill area. Dilute with

water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

Large spill: Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses.

basements or confined areas. Wash spillages into an effluent treatment

plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or

diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact

information and Section 13 for waste disposal.

Section 7. Handling and storage

Precautions for safe handling

Protective measures: Put on appropriate personal protective equipment (see Section 8).

Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapor or mist.

Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse

container.

Advice on general occupational hygiene:

occupational hygiene: Eating, drinking and smoking should be prohibited in areas where this

material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also

Section 8 for additional information on hygiene measures.

Conditions for safe storage, including any incompatibilities:

Shield UV light sources. Do not store above the following temperature: 38°C (100.4°F). Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and

kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

Section 8. Exposure controls/personal protection

Control parameters

Occupational exposure limits

Ingredient name	Exposure limits			
*Pentaerythritol tetra(3-	AIHA WEEL (United States, 10/2011).			
mercaptopropionate)	Absorbed through skin.			
	TWA: 1 mg/m³ 8 hours.			

Appropriate engineering

controls:

Good general ventilation should be sufficient to control worker exposure

to airborne contaminants

Environmental exposure

controls

Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to

reduce emissions to acceptable levels.

Individual protection measures

Hygiene measures: Wash hands, forearms and face thoroughly after handling chemical

> products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to

the workstation location.

Eye/face protection: Safety eyewear complying with an approved standard should be used

> when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher

degree of protection: chemical splash goggles.

Skin protection

Hand protection: Chemical-resistant, impervious gloves complying with an approved

standard should be worn at all times when handling chemical products if

a risk assessment indicates this is necessary. Considering the

parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves

cannot be accurately estimated.

Personal protective equipment for the body should be selected based on **Body protection:**

the task being performed and the risks involved and should be approved

by a specialist before handling this product.

Other skin protection: Appropriate footwear and any additional skin protection measures should

be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Respiratory protection: Use a properly fitted, air-purifying or air-fed respirator complying with an

approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the

selected respirator.

Section 9. Physical and chemical properties

Appearance

Physical state: Liquid. [Viscous liquid.]
Color: Clear. Violet. [Light]

Odor: Characteristic. Acrylate odor [Slight]

pH: Not availableMelting point: Not available.Boiling point: Not available

Flash point: Closed cup: >100°C (>212°F) [Setaflash.]

Lower and upper explosive

(flammable) limits:Not availableVapor pressure:Not availableVapor density:Not available

Relative density: 1.15

Solubility: Insoluble in the following materials: cold water and hot water.

Solubility in water: Not available.

Partition coefficient: noctanol/

water:
Auto-ignition temperature:
Viscosity:

Not available.
Not available.
Not available

Section 10. Stability and reactivity

Reactivity: No specific test data related to reactivity available for this product or its

ingredients.

Chemical stability: The product is stable.

Possibility of hazardous

reactions: Hazardous polymerization may occur under certain conditions of storage

or use. These could cause the product to polymerize exothermically.

Unintentional contact with them should be avoided.

Conditions to avoid: No specific data. Incompatible materials: No specific data

Hazardous decomposition

products: Under normal conditions of storage and use, hazardous decomposition

products should not be produced.

Section 11. Toxicological information

Information on toxicological effects

Acute toxicity

Tate termination				
Product/ingredient	Result	Species	Dose	Exposure
name				
*Pentaerythritol tetra(3- mercaptopropionate)	LD50 Oral	Rat	4000mg/kg	-

<u>Irritation/Corrosion</u>

Product/ingredient name Result Species Score Exposure Observation
*Pentaerythritol tetra(3-mercaptopropionate) Skin - Mild irritant Rabbit - 500 mgs

Information on the likely

routes of exposure: Not available.

Potential acute health effects

Eye contact: Causes serious eye irritation.

Inhalation: No known significant effects or critical hazards.

Skin contact: Causes skin irritation. May cause an allergic skin reaction.

Ingestion: Irritating to mouth, throat and stomach.

Symptoms related to the physical, chemical and toxicological characteristics

Eye contact: Adverse symptoms may include the following:

pain or irritation watering redness

Inhalation: No specific data.

Skin contact: Adverse symptoms may include the following:

irritation redness

Ingestion: No specific data.

Delayed and immediate effects and also chronic effects from short and long term exposure

Short term exposure Potential immediate

effects: Not available.

Potential delayed effects: Not available.

Long term exposure Potential immediate

effects: Not available. Potential delayed effects: Not available.

Potential chronic health effects

Not available.

General: Once sensitized, a severe allergic reaction may occur when

subsequently exposed to very low levels.

Carcinogenicity:

Mutagenicity:
No known significant effects or critical hazards.

Numerical measures of toxicity

Acute toxicity estimates

Not available

coefficient (Koc): Not available.

Other adverse effects: No known significant effects or critical hazards.

Section 13. Disposal considerations

Disposal methods:

The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Hazardous Material Information System (U.S.A.)

Caution: HMIS® ratings are based on a 0-4 rating scale, with 0 representing minimal hazards or risks, and 4 representing significant hazards or risks Although HMIS® ratings are not required on SDSs under 29 CFR 1910. 1200, the preparer may choose to provide them. HMIS® ratings are to be used with a fully implemented HMIS® program. HMIS® is a registered mark of the National Paint & Coatings Association (NPCA). The customer is responsible for determining the PPE code for this material.
